It is surprisingly difficult to identify certain species eg; rockcod, rubberlip and it is absolutley essential to provide at a minimum the following pics: (In many cases we will consult ORI and SANBI for assistance with ID)

1. Fish alone on the ground, flat and picture taken from above
 2. Fish on the scale showing weight.
 3. Fish with comparative item or against a ruler or tape measure.
 4. Close up of head, body and dorsal fins exposed.
 5. Diver holding the fish.

For fish that are not easy to ID, the following will assist;

1. Pic into the mouth, open.
2. Gill raker count and pic.
3. Dorsal fin hard spine and soft spine count.
4. Get pictures of the fish as soon as possible with "live" colour and or special marks.

Please send a copy of the scale certification.

Special Notes that may assist in Identification of the fish.
